

# AUTOMATED EXTERNAL DEFIBRILLATORS

## AED LOCATIONS AT BAYLOR LAW:

- 1st Floor – In Library, behind counter
- 2nd Floor – Across from Room 234
- 2nd Floor – Library by stairwell near study carrels
- 3rd Floor – Near office 314D
- 3rd Floor – Near 302B

## IF SOMEONE COLLAPSES OR CANNOT BREATHE:

- Check for a response. Call 911 and either retrieve the AED or instruct another to do so.
- If the person is occasionally gasping for air or not breathing at all, begin CPR.
- Place the heel of one hand in the center of the chest, and place your second hand on top, interlocking fingers. Press down firmly with straight arms at 100 to 120 times per minute. (The beats in 'Staying Alive' by the Bee-Gees, 'About Damn Time' by Lizzo, and 'Baby Shark' by Pinkfong are good rhythms to follow.)
- After 30 compressions, open their airway (tilt head back, lift chin), pinch their nose shut, and place your mouth over the person's mouth to make a complete seal. Blow into the person's mouth to make the chest rise. Deliver TWO rescue breaths, then resume compressions.
- Continue CPR until AED arrives.
- Attach AED pads to the patient's bare chest and follow AED voice prompts.
- Continue CPR and follow AED prompts until EMS arrives.

**NOTE: You do NOT have to be CPR/AED trained or certified to use an AED. Simply follow the voice prompts given by the AED.**
